

Please leave Wisconsin's no call law as is. The people we want to have calling us respect our households. Former suppliers trying to regain our business do not. Let Wisconsin's law do what it was written to do - protect our privacy and our ability to make choices within our homes. If they want to work hard to gain our business, let them do it while we are their customers. If they have good customer service and fair pricing, then we won't have a need to switch to another supplier, and they won't have a need to lobby you to change our law!
